

# Trigger Tension Scale

Measures from 8 oz. -10 lbs.  
Available in Kg. Weights

Designed for the demanding conditions of professional target shooting competition, the **Tru-Weight Trigger Tension Scale** gives consistent and accurate trigger weights to any firearm design from 8 oz. up to 10 lbs in 2 oz. increments. High manufacturing tolerances are the secret to accurate readings. Each scale is hand calibrated at the factory by experienced craftspeople who are firearm enthusiasts.

The **Tru-Weight Trigger Tension Scale** is easy to operate by either right or left-handed shooters on rifles or pistols. The tattle-tale indicator and wide hook design allows the user to focus on an accurate reading which increases safety. The small, compact size (10" overall) is easily stored with your gear.

The **Tru-Weight Trigger Tension Scale** is fully warranted by Feather River Sports for the life of the product.

Available packaging consists of a clam tag secured on top of a narrow poly bag with a hang hole. User instructions are printed on a separate sheet contained in the packaging.

Shooter safety is important to Feather River Sports. Treat all firearms as if they were loaded. Never use the Trigger Tension Scale on a loaded firearm. When inspecting, calibrating or repairing a firearm always point the muzzle in a safe direction. The Trigger Tension Scale is designed to measure existing trigger pull weights and any adjustments to a trigger mechanism should only be performed by a qualified gunsmith. For repeated measurements of a single firearm it is recommended to place the hook at a consistent location on the trigger. When applicable use the included O-rings over the trigger to locate the hook at the desired measuring point.
