

HR Trigger Tension Scale

CHP TESTED & APPROVED!

All **Tru-Weight Trigger Tension Scales** are fully warranted by Feather River Sports for the life of the product.

Due to the demand for a trigger pull scale that accurately measures over 10 lbs., Feather River Sports is pleased to announce the new **Tru-Weight HR Trigger Tension Scale** which measures from 0 to 25 lbs. This light-weight but extremely tough scale measures 11" overall.

Created exclusively to measure these firearm designs:

- Double-Action Pistols
- Military Pistols
- Military Surplus Rifles
- Law Enforcement Rifles

The **Tru-Weight HR Trigger Tension Scale** is easy to operate by either right or left-handed shooters on rifles and pistols. The tattle-tale indicator and wide padded hook design allows the user to focus on an accurate reading which increases safety. The small, compact size (11" overall), and bright color is easily located and stored with your gear.

Designed for the demanding conditions of the professional competition target shooter and serious armorer but with ease of use for the average firearms enthusiast, the **Tru-Weight HR Trigger Tension Scale** gives consistent and accurate trigger weights to any firearm design.

High manufacturing tolerances are the secret to accurate readings. Each scale is hand calibrated at the factory on a special test stand with three weight variables.

Anodized Finish For Durability

Wide, Padded Hook Design

Shooter safety is important to Feather River Sports. Treat all firearms as if they were loaded. *Never* use the Trigger Tension Scale on a loaded firearm. When inspecting, calibrating or repairing a firearm always point the muzzle in a safe direction. The HR Trigger Tension Scale is designed to measure existing trigger pull weights and any adjustments to a trigger mechanism should only be performed by a qualified gunsmith.
